Microsoft Recruiting Team  
Microsoft Corporation

I am writing to express my strong interest in the **Software Engineering Internship** at Microsoft. As a Computer Science student with a solid foundation in algorithms, web development, and systems design, I'm excited by the opportunity to contribute to Microsoft.

Recently, I developed and deployed an **enterprise-grade SaaS application** called **MaxProfit**, currently used by real software companies to manage and forecast project-level profitability. The platform features secure role-based access control, a real-time profit computation engine with FX conversion, and interactive dashboards with forecasting and "*What-If*" simulation. I built this full-stack solution using **React**, **Flask**, **MySQL** and **Docker**, along with CI/CD pipelines via GitHub Actions.

This hands-on experience has not only sharpened my software engineering skills, but also strengthened my ability to work across system boundaries, deliver user-focused features, and continuously adopt new tools and practices. I thrive in collaborative environments and value code quality, efficiency, and clarity. I am particularly drawn to Microsoft's emphasis on growth mindset, engineering excellence, and real-world impact at scale.

I am eager to bring my technical skills, enthusiasm for learning, and passion for impactful software to Microsoft's vibrant intern community. Thank you for considering my application. I would be honored to contribute to your team and learn from some of the world's best engineers.

Sincerely,  
**Vasudev Kishor**
